**White Water Walk**

Take a walk like no other, along a boardwalk at the very edge of one of the world's wildest stretches of whitewater! Marvel at the relentless power and beauty of nature, and see how the deep and narrow Great Gorge was created. Trillions of gallons of water are forced into this accelerating trough--the sight will take your breath away!

**Whirlpool Aero Car**

Soar the Great Gorge, high above the racing Niagara River. You'll be transported through the air in an antique cable car, while far below the torrent of water abruptly changes direction and creates one of the world's most mesmerizing natural phenomena - the Niagara Whirlpool. Sometimes frightening and always unforgettable!

**Butterfly Conservatory**

This magical attraction features over 2,000 colorful tropical butterflies floating freely among lush, exotic blossoms and greenery. Paths wind through the rainforest setting, past a pond and waterfall and the Emergence window, where butterflies leave their pupae and prepare to take their first flight!

**Floral clock**

The planted face is maintained by Niagara Parks horticulture staff, while the mechanism is kept in working order by Ontario Hydro, the organization that originally built the clock. The intricate designs on the face of the timepiece are created with up to 16,000 carpet bedding plants. The floral design is changed twice each year, featuring viola in the Spring and four cultivars of Alternanthera along with green and grey forms of Santolina Sage during the Summer and Fall. California Golden Privet and Blue Festuca Grass may be used for contrast. The grounds surrounding the clock feature bedding displays and a tower at the back of the clock houses Westminster chimes that greet each quarter hour. If the door into the tower is open, you can take a glimpse at the clock mechanism and enjoy photographs that show the history of almost every face design all the way back to 1950.
